Salman Farooqi

Mern stack developer

I am passionate about technology and am eagerly seeking opportunities in the realm of web development. Having a solid foundation in the MERN stack, I've dedicated significant time to enhancing my web development expertise. I'm keen on further refining my skills under the guidance of a seasoned mentor.

Projects

Portfolio website

In this personal portfolio website I used React, Express, and MongoDB and for user authentication, I utilized Formik and Yup. Designed with an intuitive user interface, the platform provides an immersive experience for visitors, offering a detailed glimpse into my professional journey and technical proficiencies. Hospital Management system

Hospital Management System An integrated solution developed using React, Express, MongoDB and styled with Tailwind and Toaster. The platform features dedicated dashboards for administrators, patients, doctors, and pharmacies, ensuring seamless management and coordination. It also incorporates an efficient patient appointment system, all encapsulated within an optimized user experience. Github Repository Link (<https://bit.ly/3ryPs1L>)

Ecommerce

This Ecommerce project is utilizing React, Express, and MongoDB enhanced with Tailwind and Toaster for a refined user interface. The system boasts an administrative dashboard, enabling seamless product management capabilities such as addition, updating, and deletion. The homepage features an interactive product carousel, with detailed product pages offering comprehensive insights. An integrated cart page ensures a smooth shopping experience for users.
